

The water heater element that mines Bitcoin while it heats.

Bitwater by Heatbit replaces the lower element in a standard electric tank with an element that has a Bitcoin miner built in. Your customer gets the same hot water on the same electricity — plus Bitcoin. You get a product nobody else on your route is offering yet.

WHY YOUR CUSTOMERS WANT IT

- **Heat + Bitcoin, same bill.** Twenty mining chips heat the water as they hash — up to 34 TH/s on electricity that was being spent on hot water anyway.
- **An anode that never wears out.** A powered titanium anode replaces the sacrificial rod: no dissolving, no replacement visits, no rotten-egg smell from a spent magnesium rod.
- **Less limescale.** The element's large surface runs at 140–149°F — too cool for scale to bake on, even in hard-water homes.
- **Leak detection included.** A sensor at the tank's base alerts the customer's phone at the first sign of water — before a slow leak becomes a flooded floor.
- **Smart by default.** App control, off-peak scheduling, and a weekly 140°F disinfection cycle.

WHY YOUR TECHS WILL LIKE IT

- **Installs like the element you already carry.** Standard 1" NPSM port, 30–80 gal electric tanks (A. O. Smith, Rheem, Bradford White, State, Richmond, Whirlpool, Kenmore, GE). **No plumbing changes, no new circuit** — the controller plugs into any 110–240 V outlet. Drain, swap, refill, connect the app.

Bitwater installed in the lower element port of a standard electric tank.

SPECS

Hashrate	up to 34 TH/s
Chips	20 × BM1370
Efficiency	from 12 J/TH
Power	up to 600 W, auto-tuned
Fit	1" NPSM, 30–80 gal electric
In the box	Element, controller, cord, wrench, guide, leak sensor

\$899

Genesis batch preorder — later batches up to \$1,299. Refundable preorder. Ships Q1 2027.

The element up close: Eco Brass heatsink, mining board, powered titanium anode, 1" screw-in head.

PARTNERING WITH ENVIROMINE

Stock & demos

Genesis-batch units for your shop, plus a demo element for your counter or showroom.

Tech training

We train your installers on the swap and the two-minute customer explanation, and ride along for your first installs.

We take the crypto questions

Wallet setup, app onboarding, and “where’s my Bitcoin?” calls come to us — your team just does the install it already knows.

Stock Bitwater before your competitors do.
